

SUMMARY

Results-driven Software Engineer with 3+ years of experience developing scalable applications. Proven ability to deliver production-ready solutions with high usability and cost efficiency, optimize performance (96+ Lighthouse scores, good SEO ranking for branded queries), automate CI/CD pipelines to reduce deployment time and enhance reliability.

TECHNICAL SKILLS

- **Languages:** JavaScript (TypeScript), HTML, CSS, C/C++, Python, SQL.
- **Technologies:** ReactJS (NextJS), VueJS (NuxtJS), ExpressJS, TailwindCSS, Git/GitHub, Docker, Terraform, Ansible.
- **Tools:** Jira, Figma, Adobe Illustrator, GitHub Copilot, Claude Code.
- **Soft Skills:** Working independently, Teamwork, Communication, Time Management.
- **Others:**
 - Proficient in competitive programming with strong problem-solving skills.
 - Solid foundations in Object-Oriented Programming (OOP), Data Structures, and Algorithms.
 - Experienced in setting up CI/CD pipelines and automation using GitHub Actions, Docker, Terraform, and Ansible.
 - Skilled in building and integrating RESTful APIs, designing logos, developing desktop applications and 2D games.

EXPERIENCE

- **Tiger Tribe (A HEINEKEN Company)** HCMC, Vietnam
Frontend Engineer Intern Dec 2025 - Present
Company Context: A digital innovation hub developing internal and consumer-facing tech solutions.
Scope & Responsibilities: Managed frontend development for internal business platforms. Participated in Agile/Scrum processes, code reviews, and collaborated with cross-functional teams to ensure a scalable codebase.
 - **Streamlined global restructuring operations** by developing the HBS tool, replacing manual, error-prone Excel tracking with a centralized platform that syncs directly with PowerBI for real-time transition visualization across regional hubs.
 - **Accelerated enterprise-wide AI capability building** by developing interactive e-learning user interfaces and seamlessly integrating an OpenAPI-powered chatbot backend to facilitate hands-on training for staff.
 - **Ensured high system scalability and reduced production bugs** via strict TypeScript architecture, enabling the HBS platform to be successfully cloned and adopted as the central project management tool.
- **Freelancer** HCMC, Vietnam
Software Engineer Jun 2025 - Present
Company Context: Independent software engineer delivering scalable, production-ready full-stack web applications for diverse clients.
 - **Streamlined content deployment workflows** by architecting a full-stack platform for The P Mortgage using Next.js and Directus CMS, enabling seamless, rapid static content generation.
 - **Decreased infrastructure maintenance overhead** by implementing Komodo for centralized VPS management, streamlining service deployments via Docker containers and Compose.
 - **Achieved a 96+ Lighthouse performance score and improved SEO rankings** by configuring Nginx to optimize Next.js rendering, load times, and server performance for The P Mortgage platform.

PROJECTS

- **thep** Jan 2026 – Present
thepcapital.ca
 - **Description:** A comprehensive mortgage platform featuring advanced financial calculation tools for home buyers.
 - **Technologies:** ReactJS (NextJS), Tailwind CSS, TypeScript, Directus CMS, Docker, Nginx.
 - **Key Contributions:**
 - * **Enabled out-of-the-box financial planning for users** by engineering interactive, high-performance calculators for monthly mortgage payments, Gross Debt Service (GDS), and Total Debt Service (TDS).

- * **Streamlined content management and boosted platform scalability** by integrating Directus CMS with a robust Next.js and Hono backend, securely deployed via Docker and Nginx.

- **dooriot**

Sep 2025 – Dec 2025

yuran1811/hcmus-iot-dooriot

- **Description:** A secure, IoT-connected smart door system featuring NFC access control and real-time remote monitoring.
- **Technologies:** Arduino, VueJS (NuxtJS), Tailwind CSS, TypeScript, Nx, Docker.
- **Key Contributions:**
 - * **Engineered seamless hardware-to-cloud integration** between Arduino sensors (NFC, motion) and a scalable web backend, achieving real-time remote access control with 10ms latency.
 - * **Developed a comprehensive, responsive web dashboard** using NuxtJS and Tailwind CSS, enabling users to manage device access, track activity logs, and receive instant tamper notifications.
 - * **Streamlined system scalability and deployment speed** by utilizing an Nx monorepo structure, containerizing services with Docker, and deploying via Render and Vercel.

- **wanhub**

May 2025 – Sep 2025

hcmus-intro2se-wanhub.vercel.app

- **Description:** A modern, easy-to-use learning platform for everyone.
- **Technologies:** VueJS (NuxtJS), NodeJS (ExpressJS), Tailwind CSS, TypeScript, Prisma, Supabase, Docker, Terraform, Ansible, Nx.
- **Key Contributions:**
 - * Automated CI/CD workflows by designing GitHub Actions pipelines and integrating Vercel CLI, Docker, Terraform, and Ansible, improving deployment speed and reliability.
 - * Led technology selection and development environment setup; enforced code quality and maintainability through peer reviews, best practices, unit testing (Vitest), end-to-end testing (Playwright), and refactoring.
 - * Developed secure authentication and authorization flows and built interactive learning modules (flashcards, dictation, cloze, multiple-choice quizzes) with responsive UI.
 - * Architected the system design and implemented scalable RESTful API endpoints to support application features.
 - * Created intuitive UI component libraries and branding assets, enhancing design consistency and user experience.
 - * Configured Jira with custom automations to streamline project tracking and reduce manual effort.

- **yublog-nuxt**

Apr 2025 – Present

yublog-nuxt.vercel.app

yuran1811/yublog-nuxt

- **Description:** A personal blog platform built to share technical tips and insights, showcasing modern web development practices.
- **Technologies:** VueJS (NuxtJS), Tailwind CSS, TypeScript.
- **Key Contributions:**
 - * Developed a responsive, SEO-friendly blog platform with NuxtJS and Tailwind CSS.
 - * Used Nuxt Content (git-based CMS) for easy publishing and customization.
 - * Optimized performance and accessibility, achieving fast load times across devices.

EDUCATION

- **VNUHCM - University of Science**

Cho Quan Ward, HCMC, Viet Nam

*Bachelor's degree, Software Engineering; GPA: 3.93
Designer of SAB (Student Activity Board)*

2023 – Present

- **Hung Vuong Highschool for the Gifted**

Thu Dau Mot Ward, HCMC, Viet Nam

Specialized in IT

2020 – 2023
